

How to make a quilt block on point

Materials:

Quilt block

Fabric for the on point triangles

Instructions / Formula

- 1- You'll first need to know what your finished center block size will be.
 - 2- Divide this number by 1.414
 - 3- Add 0.875
 - 4- Round up!! You can always trim up the square after this is added, so I suggest that you round up to give yourself some forgiveness later.
Doing this will allow you to get 2 triangles for each square you cut.
- So, for EACH quilt block that you want to set on point - you'll need to cut 2 squares,
- 5- Cut in half diagonally from corner to corner

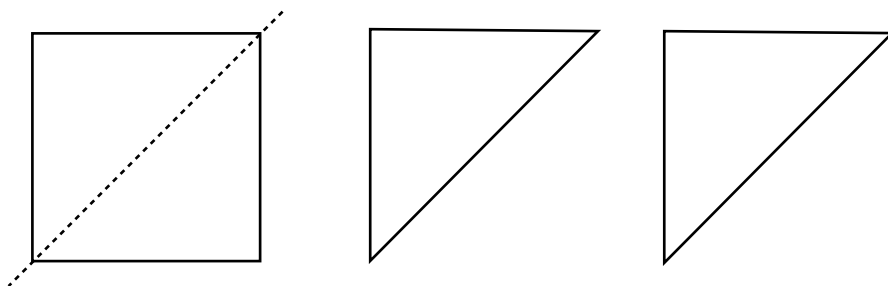

EXAMPLE:

ex: $20/1.414 + .0875 = 14.144 + 0.875 = 15.019$, or about $15 \frac{1}{8}$ ".

Now round up to $15 \frac{3}{4}$ " or 16"

CUT two squares 16". Cut two because you need four corners.

CUT each square in half on the diagonal.

How to make a quilt block on point

Materials:

Quilt block

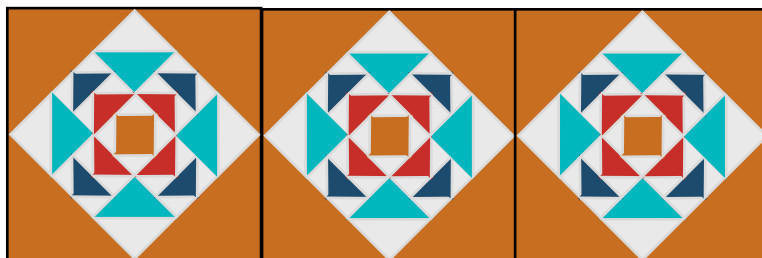

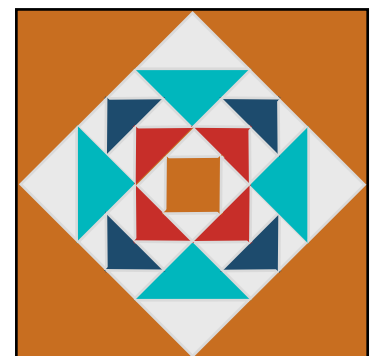

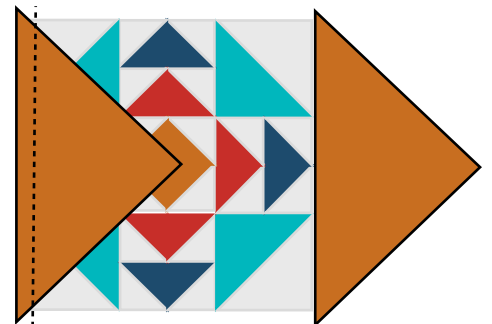

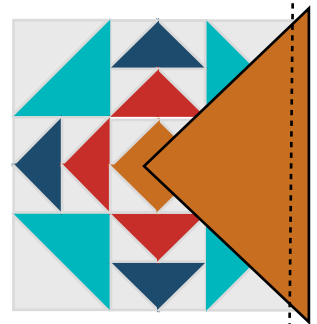

Triangles cut from previous step

Instructions / Sewing to Quilt Block

- 1- Pin triangle to one side - right sides facing
- 2- Stitch $\frac{1}{4}$ " seam allowance
- 3- Pin triangle to opposite side - right sides facing
- *Notice that the points of the triangle extend past the quilt block
- 4- Stitch $\frac{1}{4}$ " seam allowance
- 5- Press and repeat for other two triangles
- 6- Square up if needed

Repeat with additional quilt blocks

When complete, you can now sew the blocks together
Side by side in a row - with the center block now on point.
